About Me

As a results-oriented professional, I blend literary insights with technical skills, bringing over 6 years of experience in electronics and general affairs. With a degree in English Literature, I offer a unique perspective that enhances communication and problem-solving. In my role as interim head at PT. Panasonic Gobel Indonesia, I successfully boosted team productivity and achieved over 80% completion of branch repair targets. Proficient in technologies such as React.js, Next.js, TypeScript, Python, and MySQL, I am poised to make a significant contribution to my goals as a Professional Software Engineer.

Education

Universitas Terbuka

GPA: 3.58

S.S

April, 2019 – Oktober, 2023

RevoU

Full-Stack Software Engineer

In the full-stack engineering program, I learned front-end and back-end development. I built responsive user interfaces with React.js and Next.js, and managed databases with MySQL. I also gained experience in version control with Git, equipping me to create effective full-stack applications and collaborate within teams.

January, 2024 – August, 2024

Working Experiences

Technician, Panasonic Gobel Indonesia

April, 2017 – February, 2023

- Increasing productivity and achieving over 80% completion of monthly repair requests, which significantly improved branch performance metrics.
- Analyzing spare parts usage trends, reducing inventory accumulation, thereby enhancing record-keeping efficiency and operational flow.

HR - GA, KMS Telecom

January, 2024 – February, 2024

- Managing the daily attendance system by ensuring 100% reporting accuracy across all branches, resulting in reliable employee attendance data.
- Improving the logistics of the installation team, achieving an on-time attendance rate of 80%, which contributed to a 20% increase in project completion timelines.
- Conducting data analysis on attendance discrepancies, recommending solutions that significantly enhance reporting accuracy.

Organization Experiences

Logistics, Osis at Smkn 2 Baleendah

April, 2013– August, 2016

- Managing logistics for various events, ensuring smooth operations through effective team planning, and receiving positive feedback from around 80% of participants.
- Compiling and preparing event documentation using Microsoft Word, which enhances the quality of produced materials and contributes to the success of the event.

Project Experiences

Team Lead at Software Engineer, (Final Project “Mobilisayur”, RevoU)

April, 2013– August, 2016

- Merancang dan menerapkan sistem filter yang intuitif untuk klasifikasi item, yang meningkatkan skor kepuasan pengguna sebesar 20%.
- Mengembangkan tata letak dashboard yang menyeluruh yang meningkatkan navigasi pengguna, berkontribusi pada peningkatan keterlibatan pengguna sebesar 50%.

- Membangun dan mengoptimalkan basis data MySQL di backend, yang meningkatkan kecepatan pengambilan data sebesar 30% dan secara signifikan memperbaiki kinerja aplikasi.
- Menambahkan fitur akses tamu ke dalam aplikasi, menghasilkan peningkatan 15% dalam konversi pengguna dari pengunjung menjadi pengguna terdaftar.

Additional Information

Technical Skill: Intermediate in programming languages (e.g., JavaScript, Python), web development frameworks (e.g., React Js, Next Js), database management (e.g., MySQL), version control (e.g., Git), and APIs.

Soft Skill: Effective communication, strong problem-solving, adaptability, teamwork, time management, and critical thinking.

Certification: 1. Certificate of Completion Full Stack Software Engineer, RevoU

August, 2024
